

OPTIONAL EQUIPMENT

1. Support for Drip Holder carrier bar
REF. MB-DIAMED-01.
2. Table REF. MB-DIAMED-02.
3. Adjustable headrest
REF. MB-DIAMED-03.
4. Push bar
REF. MB-DIAMED-04.

ELECTRIC ESPECIFICATIONS

Power supply	230/110V 50/60Hz
Maximum current intake	1.6A, 370 Volt
Protection indicator	IP 66
Protection class	Class I
Electric shock protection	Type B

TECNICAL DATA

External dimensions	192 x 91 cm
Backrest dimensions	59 x 83 cm
Pelvic area dimensions	59 x 52 cm
Legrest dimensions	59 x 58,5 cm
Height adjustment	65,0 - 81,5 cm.
Backrest tilting	70°
Trendelenburg tilting	22°
Maximum working load	180 kg
Weight without accessories	135 kg

Clinical Furniture

A Multi-purpose Chair

DIAMED PRO

www.medical-iberica.com

DIAMED PRO CHAIR

A multi-purpose chair that has been developed to meet the highest demands of a standard hospital environment.

The attractive design of the **DIAMED PRO** chair creates a feeling of well-being for the patient. The exclusive design conforms to the highest standard, increasing the prestige of any clinical centre

IN SUMMARY

Its design allows facilitates cleaning and disinfection.

It has a pleasant and compact design.

It provides a comfortable place to relax making a patient's stay more pleasant.

It reduces the physical effort to move the patient.

RAILS

Height adjustable side rails with injected polyurethane (PUR) integrated armrests.

EASY MOVEMENT

The chair's control panel has pictograms that are easy for the patient to understand. In addition, it also includes two pre-programmed functions to adjust the height of the chair, or the tilting of the backrest and legrest sections, which make it easy to adopt a seated position or the Trendelenburg position.

SAFETY

Controllable CPR position that allows the backrest to be reclined mechanically without the need to be connected to a power supply.

EASE OF MOVEMENT

Four 125 mm diameter castors facilitate the chair's movement and reduces the effort needed to move it and manoeuvre it along narrow corridors and through doors.

Trendelenburg 22°.

DIAMED PRO

A chair to suit each individual's needs

ARMRESTS

The folding ergonomic armrests facilitate access to the seat. The **DIAMED PRO** chair system has been developed to allow both the extension of the armrests and their adjustment at any angle.

COMFORT

The **DIAMED PRO** chair has undergone extensive testing in laboratories to ensure that it combines ergonomics with the utmost comfort in order to improve the patients' health and quality of care.

Useful surface: 100%.

Bed base platform profiling by means of low-tension electric motors compliant with standard EN 60601.

UPHOLSTERY AND PADDING

High-density polyurethane foam backrest and seat. Upholstered with M-1 standard-compliant self-extinguishing vinyl. Easy to clean and maintain.

HANDLING

Main frame with a support for a CO2 bottle.

BED BASE

Epoxy-coated steel tube frame

Scissor-lift raising system for greater stability and maximum loads of 230 kg.

Supports for additional accessories incorporated.

MOBILITY

Four 125 mm diameter swivelling castors with a centralised braking system and power steering make for easy handling and manoeuvring of the chair.
