

OMEGA BASIC Treatment tables

STRUCTURE

- Extremely robust and stable structure.
- Cushions: padding made from 40 mm thick high-density polyurethane foam, upholstered with antibacterial, abrasion and stain-resistant, M-1 class self-extinguishing vinyl that is available in 8 different colours.
- Pneumatically adjustable sections, with non-slip ergonomic handles.
- The pneumatic springs are activated by pressing the cushions upwards and the position is automatically locked when the handle is released.
- High-density polyurethane foam padding.
- Antibacterial, abrasion and stain-resistant, M-1 class self-extinguishing vinyl upholstery.

EASE OF HANDLING AND MANOUVERING

- A treatment stretcher that guarantees dynamic stability.

FUNCIONALITY

- Functional design: maximum lying area for patient and therapist.
- The functional design takes into account comfort and every therapeutic detail. Carefully designed to be suitable for daily use and adding value to a doctor's consultancy.
- Ergonomic breathing hole with a padded plug. Headrest tilt up to 75°

MOBILITY

- Retractable rubber wheels and centralized height adjustment system.
- Height adjustment controlled by electric motor (with foot control)

o Minimum height of 45 cm.

OMEGA Treatment tables

With many functions to maximize comfort and personalize care

STANDARD EQUIPMENT

1. Foot control
2. Mouth-nose opening

OPTIONAL EQUIPMENT

1. Paper roll holder
2. Hydraulic height adjustment

ELECTRICAL SPECIFICATIONS

Power supply	230/110V 50/60Hz
Maximum current intake	1.6A, 370 Volt.
Protector indicator	IP 66
Protection Class	Class I
Electric shock protection	Type B

Conformity with the CE marking directive 93/42/EEC

TECHNICAL DATA

Total length	202 cm
Base width	67 cm
Height from floor to seat	min 45 cm
	max 95 cm
Backrest tilting	70°
Seat tilting	17°
Maximum working load	230 kg
